**Identify
bags quickly**

- Easy tracking
- Save time
- Save money

Baggage Reconciliation System

KEEPING TRACK OF YOUR PASSENGER ASSETS

The yearly cost of baggage claims and departure delays can run well into the millions of Dollars. Careful planning can offset the cost of a baggage reconciliation system with savings realized in reducing the amount of misdirected bags.

Airport operations Managers are concerned about baggage security

and tracking efficiency, and airlines needs to know where each bag is always, whom it belongs to, and whether loaded bags are matched with a boarded passenger.

Usage of available data as a tool for increasing success rate of bags with reduced connection time and an overview of the remaining bags in the system.

CHALLENGE:

High baggage mishandling costs

SOLUTION:

BAG LOST ANALYSIS

Can predict real travel time from the loading station to the departing flight for each bag.

Early forecast for available connection time allows flexible decision making, and are able to work and move at ease.

CHALLENGE:

High costs at No show

SOLUTION:

REAL-TIME TRACKING

Real time tracking helps you keep passengers and baggage together, and planes departing on time. If a passenger fails to arrive at the aircraft, the bag can be quickly located and removed from the hold, minimizing any impact on ontime performance.

CHALLENGE:

High-cost training

SOLUTION:

INTUITIVE USABILITY

Our Web based app is designed to be simple to use and requires no formal training.

You can also customize or develop the user interface based on your individual needs.

\$250

= Average price for 1
lost baggage

With our solution your
clients will save money,
1 bag at a time.
Every bag counts!

Easy training, max

1 day!

Intuitive solutions
makes training easy.
Fast training means less
time away from work.
= Saving money

LOW COST

implementation

We only use standard
components and our
easily implemented
web applications.

= No specialists needed
& no waiting for parts

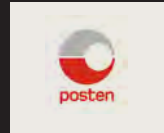

Airline operators
in charge
of bag distribution
and redirection

With our solution
the airline operators
can easily see which
late bags will make it to
the flight, or redirect late
baggage to the next.

Kongsberg Industrial Solutions AS

We have over 20 years of experience in the Baggage Handling System (BHS) and Self-service Baggage Drop (SBD) industry. We design customized solutions to match your requirements and expectations.
